

EuroNDD

April 9-10, 2026, Warsaw

Dear Colleagues

We are pleased to share with you that we have officially launched our third edition of the **EuroNDD meeting**, the first European workshop for a multidisciplinary view on rare genetic neurodevelopmental disorders!

Building on the success of previous editions, next year's meeting will feature research presentations, panel discussions, and interactive workshops designed to encourage knowledge-sharing and interdisciplinary collaboration.

You can register and submit your abstract directly [on our website](#). Abstract submissions are open until **October 31, 2025**.

This year's themes will be:

- Understanding neurobiology through genes, disease mechanisms, model systems, and genotype-phenotype correlations
- From molecular diagnosis to intervention
- Multidisciplinary diagnostics and interventions translated into a holistic (health)care network
- Health information system and data availability: the ethical, legal and biopsychosocial aspects of data (re)use

The meeting will be held at the **Novotel Warsaw Airport**, Poland, on April 9–10, 2026.

For your convenience, we have negotiated preferential accommodation rates at the conference hotel:

€85 / 360 PLN per night for a single room

€98 / 420 PLN per night for a double room

To book your room, please email h0527-re@accor.com and mention the promo code “EuroNDD” when making your reservation

Places at the meeting are limited to 250.

Our goal with this meeting is to create a unique forum where researchers, clinicians, and patient advocates can come together to exchange ideas, strengthen collaborations, and accelerate progress in rare NDDs. Spread the word to your colleagues and stay tuned for the program!
